Professional Summary

Innovative QA Engineer bridging highly customized eCommerce platforms and conversational AI. Proven track record of building custom GenAI agents to reduce manual testing time and accelerate Agile delivery. Experienced in validating probabilistic AI models, implementing robust end-to-end automation, and building evaluation frameworks that catch regressions before production deployment.

Professional Experience

Consultant QA Engineer

Astound Digital

04/2025 – Present

Ahmedabad, India

- Engineered and deployed custom GenAI agents to automate QA artifact generation (test cases, plans, defect reports), saving approximately 40% of manual documentation time.
- Spearheaded testing of Salesforce Agentforce implementations, validating conversational flows, AI agent behaviors, and custom prompt structures to ensure model reliability.
- Designed and executed an AI-assisted performance testing framework using Apache JMeter and Python to analyze load results, pinpoint scalability bottlenecks, and validate system stability.
- Validated business workflows and data integrity across Salesforce Sales Cloud, Experience Cloud, and Data Cloud, performing continuous data analysis using SQL to validate outputs.
- Integrated automated test suites and AI validations into CI/CD pipelines to ensure continuous integration without compromising model quality or introducing regressions.
- Collaborated with cross-functional teams to define evaluation metrics for AI outputs, moving beyond strict pass/fail to assess quality and safety in probabilistic systems.

Quality Assurance Lead

Creatpix Infotech LLP

10/2023 – 04/2025

Ahmedabad, India

- Managed the QA department, full testing lifecycle, and standardized quality benchmarks across 25+ Shopify eCommerce projects and custom checkout extensions.
- Architected a custom AI Performance Testing Framework using Python, replacing traditional tools by autonomously analyzing system load metrics and generating actionable performance conclusions.
- Developed and deployed an “AI Scrum Master” model connected to Jira API to automate agile ceremonies, collect updates, analyze blockers, and generate real-time project status reports.
- Configured A/B testing scenarios and performed exploratory manual testing, validating data accuracy and contributing to a 15–20% increase in user conversion rates.
- Mentored junior engineers, established testing best practices (including defining quality standards for CI/CD), and served as the technical liaison between clients and cross-functional teams.
- Identified, documented, and corrected complex software defects, digging into edge cases to own release sign-off for new features across high-traffic platforms.

Quality Assurance Engineer (Junior)

Astound Digital

09/2022 – 08/2023

Ahmedabad, India

- Global Premium Spa & Bath Manufacturer:** Assumed full ownership of the QA pipeline mid-project. Validated complex B2B purchasing workflows, quoting, and ERP data synchronization on Salesforce B2B Commerce.
- Luxury Italian Fashion Brand:** Executed end-to-end manual and automated testing for a global Salesforce Commerce Cloud storefront, validating localized tax logic, multi-currency flows, and promotional logic.
- Global Multi-brand Apparel Portfolio:** Managed QA for diverse retail brands on Shopify, developing cross-site regression suites (including UI automation) to maintain stability during shared-codebase deployments.
- Authored detailed test cases and execution plans using Zephyr, while tracking and managing software defects within Jira.

Technical Skills

- **Testing & AI Focus:** Manual Testing, Conversational AI Testing, Prompt Validation, AI Agent Behavior Testing, UI/End-to-End Automation (Playwright experience), Performance Testing, Integration Testing, UAT, Exploratory QA, Eval Frameworks (LLM-as-judge, reference-based).
- **Tools & Methodologies:** Jira, Zephyr, Git, Apache JMeter, LLMs, LangChain/Agent Framework concepts, Salesforce Developer Console, Agile, Scrum, CI/CD Pipelines, API Testing (Postman).
- **Languages:** Python, Java, SQL.
- **Platforms:** Salesforce (Agentforce, Data Cloud, Sales Cloud, Service Cloud, Experience Cloud, B2B Commerce, Commerce Cloud), Shopify, commercetools.

Certifications

- Claude Certified Architect - Foundations (Anthropic)
- Salesforce Certified Agentforce Specialist
- Salesforce Accredited B2B Commerce Administrator
- Salesforce Certified Administrator
- Salesforce Associate Certification
- ISTQB Foundation Level Certificate (Score: 36/40)
- Shopify Planning Fundamentals
- Scrum Foundation Professional Certificate (Certiprof)

Education

Bachelor of Technology - Computer Science
Marwadi University, Rajkot, India

07/2019 – 05/2023
7.83 CGPA
